

The Cahill Group is one of the largest multi-disciplinary construction companies in Canada, with operations from Newfoundland to Alberta. We believe in taking care of our people with rewarding career opportunities, competitive compensation packages, and a dynamic working environment.

Electrical Design Coordinator

The Cahill Group is currently recruiting for an Electrical Design Coordinator to help ensure the successful execution of ongoing projects throughout Newfoundland. The Electrical Design Coordinator will support the project team on various design inquiries and provide field support as needed.

Responsibilities

- Actively participate as a member of a multi-disciplinary team and will provide design feedback prior to the implementation of electrical systems
- Certify design compliance for systems, including lighting systems and power distribution systems.
- Ensure the implementation of required codes, standards, and client design and implementation criteria
- Address technical design inquiries in the field for various projects and maintain working relationships with the client and other subcontractors
- Assist with preparation of material takeoffs, estimates, budgets and schedules

Qualifications

- Three to five years' related technical design experience
- Minimum 2 years working in a commercial construction environment
- Bachelor of Engineering Degree or diploma in Engineering Technology, equivalent experience will also be considered
- Proficient with Microsoft Office
- An understand of various design software with an aptitude to learn new technologies, experience working with BIM Modeling software is considered an asset.
- Excellent oral and written communication skills

If you are interested in joining our growing team, please apply in confidence to employment@cahill.ca, quoting competition CC-EDC-07-20.

Cahill is an equal opportunity organization. While we thank all applicants for their interest, only those under consideration will be contacted.
